

# *Helping Your Child Learn to Read*

A Parent Guide

Adapted from the National Institute for Literacy (US), by Ray Newberry (St Stephens CP School).

## *Success in school starts with reading.*

When children become good readers in their early schooling, they are more likely to become better learners throughout their school years and beyond.

Learning to read is hard work for children. Fortunately, research is now available that suggests how to give each child a good start in reading.

Becoming a reader involves the development of important skills, including learning to:

- *use* language in conversation
- *listen* and respond to stories read aloud
- *recognize* and name the letters of the alphabet
- *listen* to the sounds of spoken language
- *connect* sounds to letters to figure out the "code" of reading
- *read* often so that recognizing words becomes easy and automatic
- *learn* and use new words
- *understand* what is read

As a parent, you can help by understanding what teachers are teaching and by asking questions about your child's progress and class reading.

You can also help your children become readers. Learning to read takes practice, more practice than children get during the school day. This article describes what a quality reading programme should look like at school and how you can support that programme through activities with your children.

## *If your child is just beginning to learn to read*

### *At school you should see teachers...*

- *Teaching the sounds of language.* The teacher provides opportunities for children to practice with the sounds that make up words. Children learn to put sounds together to make words and to break words into their separate sounds.
- *Teaching the letters of the alphabet.* Teachers help children learn to recognize letter names and shapes.
- *Helping children learn and use new words.*
- *Reading to children every day.* Teachers read with expression and talk with children about what they are reading.

### *At home you can help by...*

- *Practicing the sounds of language.* Read books with rhymes. Teach your child rhymes, short poems, and songs. Play simple word games: *How many words can you make up that sound like the word "bat"?*
- *Helping your child take spoken words apart and put them together.* Help your child separate the sounds in words, listen for beginning and ending sounds, and put separate sounds together.
- *Practicing the alphabet by pointing out letters wherever you see them and by reading alphabet books.*

## *If your child is just beginning to read*

### *At school you should see teachers...*

- *Systematically teaching phonics--how sounds and letters are related.*
- *Giving children the opportunity to practice the letter-sound relationships they are learning.* Children have the chance to practice sounds and letters by reading easy books that use words with the letter-sound relationships they are learning.
- *Helping children write the letter-sound relationships they know by using them in words, sentences, messages, and their own stories.*

- **Showing children ways to think about and understand what they are reading.** The teacher asks children questions to show them how to think about the meaning of what they read.

#### At home you can help by...

- **Pointing out the letter-sound relationships your child is learning on labels, boxes, newspapers, magazines and signs.**
- **Listening to your child read words and books from school.** Be patient and listen as your child practices. Let your child know you are proud of his reading, and complete their Reading Record.

### *If your child is reading*

#### At school you should see teachers...

- **Continuing to teach letter-sound relationships for children who need more practice.** On average, children need about two years of instruction in letter-sound relationships to become good spellers as well as readers.
- **Teaching the meaning of words, especially words that are important to understanding a book.**
- **Teaching ways to learn the meaning of new words.** Teachers cannot possibly teach children the meaning of every new word they see or read. Children should be taught how to use dictionaries to learn word meanings, how to use known words and word parts to figure out other words, and how to get clues about a word from the rest of the sentence.
- **Helping children understand what they are reading.** Good readers think as they read and they know whether what they are reading is making sense. Teachers help children to check their understanding. When children are having difficulty, teachers show them ways to figure out the meaning of what they are reading.

#### At home you can help your child by...

- **Rereading familiar books.** Children need practice in reading comfortably and with expression using books they know.
- **Building reading accuracy.** As your child is reading aloud, point out words they have missed and help them read words correctly. If you stop to focus on a word, have your child reread the whole sentence to be sure they understand the meaning.
- **Building reading comprehension.** Talk with your child about what they are reading. Ask about new words. Talk about what happened in a story. Ask about the characters, places, and events that took place. Ask what new information they have learned from the book. Encourage them to read on her own.

### *Make reading a part of every day*

- **Share conversations with your child over meal times and other times you are together.** Children learn words more easily when they hear them spoken often. Introduce new and interesting words at every opportunity.
- **Read together every day.** Spend time talking about stories, pictures, and words.
- **Be your child's best advocate.** Keep informed about your child's progress in reading and ask the teacher about ways you can help.
- **Be a reader and a writer.** Children learn habits from the people around them.
- **Visit the library often.** Story times, computers, homework help, and other exciting activities await the entire family.

**Please speak to your child's teacher for advice!**
